# Natural Stone Edging How To & Helpful Hints For Homeowners & Landscapers

## Natural Stone Edging

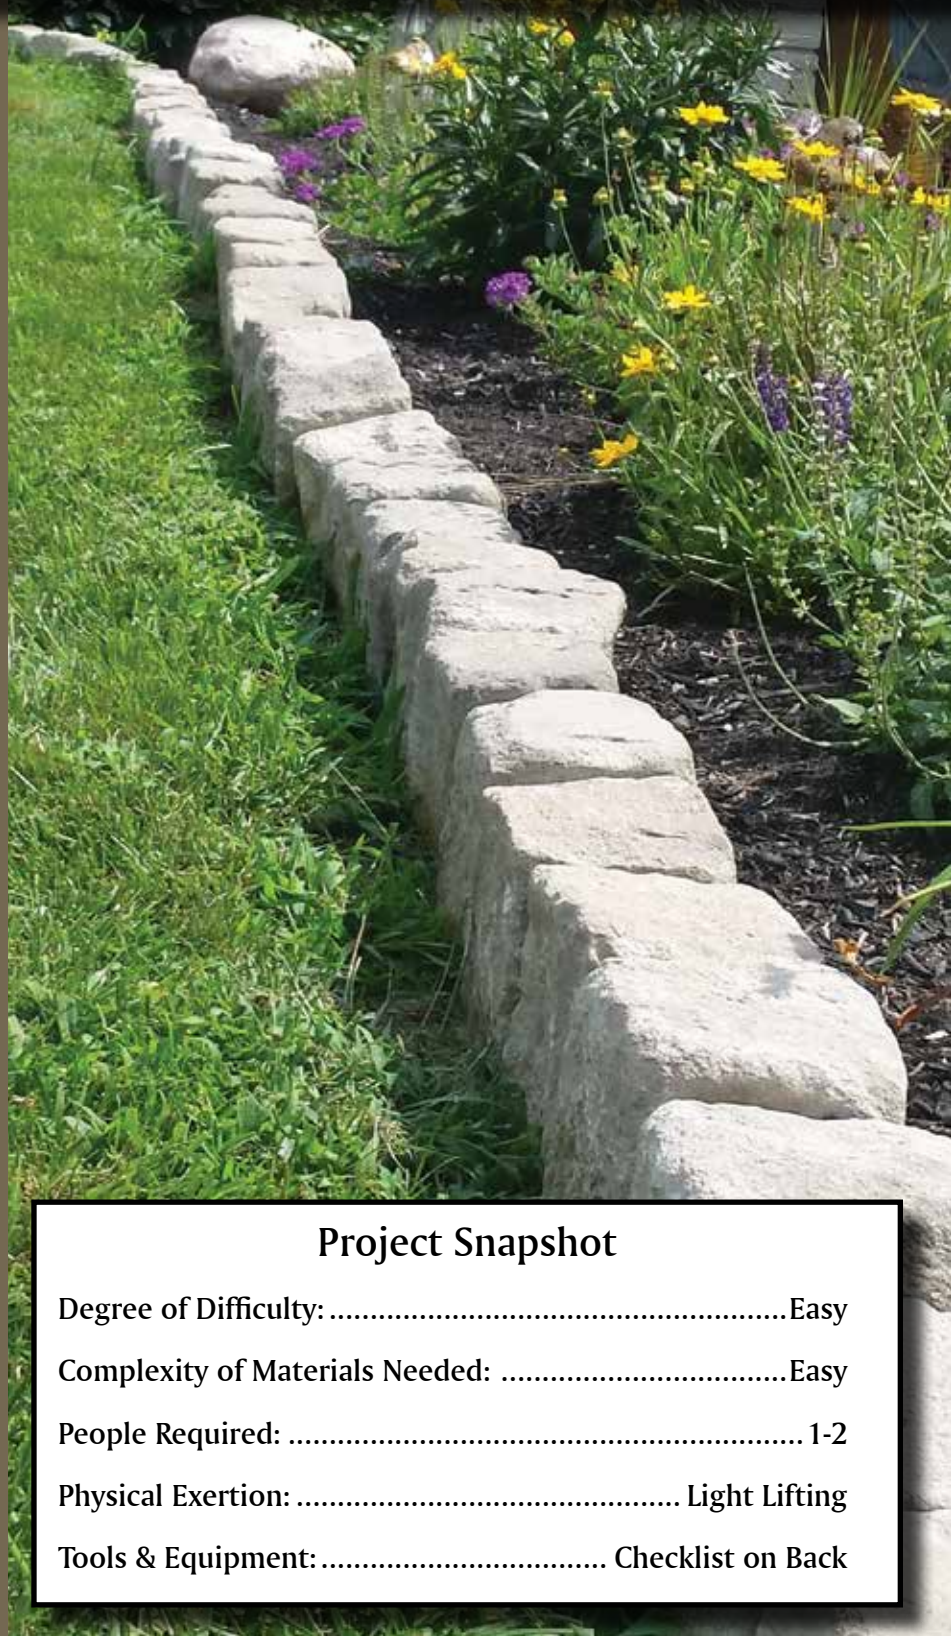

A natural stone edge around your flower and plant beds will enhance your landscape design by providing a finished, but rustic look of elegance.

Natural Stone Edging is a simple yet elegant solution to finishing your plant beds. No special skills or tools are needed to complete this project.

When finished your mulch or pea gravel will stay in your beds and after mowing and trimming you'll enhance the curb appeal of your property.

### Before You Start:

- **CALL BEFORE YOU DIG:** By law, everyone **MUST** contact the Ohio Utilities Protection Service, 8-1-1 or 1-800-362-2764, at least 48 hours but no more than 10 working days (excluding weekends and legal holidays) before beginning ANY digging project.
- Check with your HOA and local municipalities for any required permits and to insure you follow all local ordinances.
- Make sure you and your crew are up to the physical and mental challenges of your project and that you have all necessary tools on hand!
- Plan the work and work the plan!
- If you get stuck call us and we can help you determine what materials are needed.

### Project Snapshot

- Degree of Difficulty: ..... Easy
- Complexity of Materials Needed: ..... Easy
- People Required: ..... 1-2
- Physical Exertion: ..... Light Lifting
- Tools & Equipment: ..... Checklist on Back
